

TERRAPIN X

# CONNECTING

your TERRAPIN X to the GARMIN Delta Tactix<sup>®</sup> Solar

- By pressing and releasing the push button of your TERRAPIN X you turn on the device
- You will now see the digital aiming reticle in the display of your TERRAPIN X

- Press and release the push button of your TERRAPIN X three times in quick succession to enter the Bluetooth menu
- In the display you will see the last saved setting. This can either be "OFF", "APP", "hEST" (for KESTREL) or "tdH"

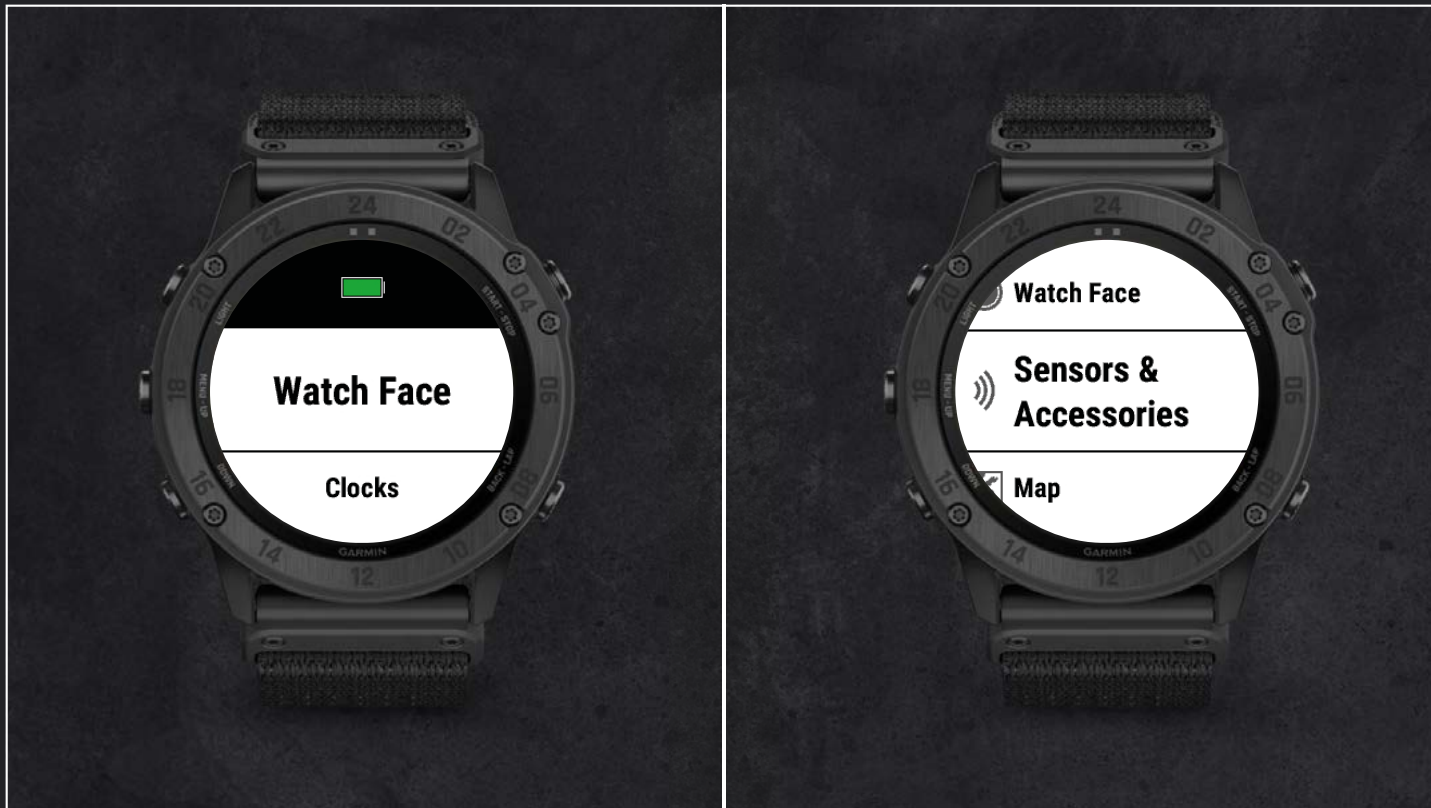

- Toggle through the options by pressing and releasing the push button of your TERRAPIN X until you reach "tdH"

- Confirm this setting by pressing and releasing the push button three times in quick succession
- As confirmation four dashes ("----") will appear in the display of your TERRAPIN X
- Besides the electronic aiming reticle you will now also see a flashing Bluetooth symbol in the display of your TERRAPIN X. This signifies that the TERRAPIN X has entered the pairing mode

- Press and hold the «MENU - UP» button of your Garmin tactix® Delta Solar to enter its main menu.
- In the main menu toggle to «Sensors & Accessories» and enter the menu by pressing the «START - STOP» button.

- In the «Sensors & Accessories» menu toggle to «Add New» and enter menu by pressing «START - STOP».
- In menu «Add New» toggle to «Vectronix» and activate search for your TERRAPIN X by pressing «START - STOP». Please make sure that your TERRAPIN X is actively searching (in "tdH" mode) for a compatible device. This is signified through a flashing Bluetooth symbol in the display of your TERRAPIN X.

When the connection between a Garmin tactix® Delta Solar and your TERRAPIN X is successful, the Bluetooth symbol is displayed continuously in your TERRAPIN X and in the display of the watch the message «Vectronix Connected» appears.
